

## PROPOLIS TRAP # 511

Earn extra income from your hives by collecting propolis, a resinous substance from the bark and leaves of trees and shrubs.

Put this trap on in place of your inner cover. Prop open the top a little and the bees will propolize the trap to keep out the light.

Put the trap in a bag and put it in the freezer. Take out and bang on your counter and propolis will fall from the trap to the bag.
