

#5PN - Pro-Nuc Box Assembly Instructions

You should receive the following items:

- a. Pro-Nuc Top
- b. Pro Nuc Bottom

1. Detach the frame rests and doors from the lid:

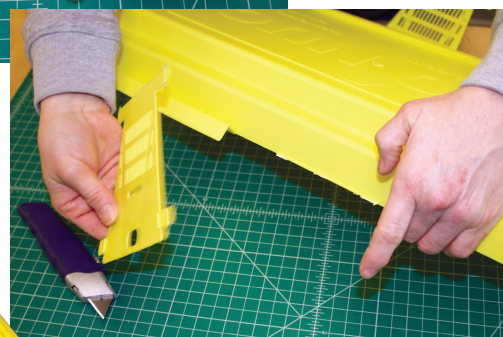

Start by carefully scoring the perforations 4-5 times with a utility knife.

- 2.

Gently bend the frame rests and doors to loosen from the cover itself and snap them off.

Once you remove the 2 doors and 2 frame rests you should have these pieces as shown.

#5PN - Pro-Nuc Box Assembly Instructions

3. Use a utility knife to make sure the insertion slots for the doors are clearly opened.

5. Install the frame rests with frame "stops" facing upward.

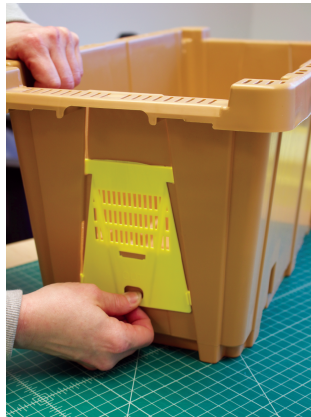

4. Install doors

Making certain that the word "OUT" is facing outward, insert the door tabs into the slots.

Push up to open the doors;

push down and secure doors to closed them.

To provide additional ventilation to your bees, place the lid on the nuc with the open window showing "VENTED".

To restrict ventilation, simply turn the lid 180 degrees so that the open window shows "NO VENT".
